

# Fish Creek Watershed: Sediment Delivery from Roads to Streams

Author: Helen Kesting, Trout Unlimited

Date: 12/14/2020

Data Sources: Roads: Sequoia National Forest,  
Stream Network: National Hydrography Dataset  
and California Department of Wildlife

This map displays road segments by the  
amount of sediment delivered to streams  
standardized by the length of each segment  
(kg/yr/m). The amount of sediment accumulated  
in streams (kg/yr) is also displayed.

## Roads

Points of Interest

\*Any road that drains further than 200m from a stream is  
considered "Not Delivering Sediment".

\*Roads were not surveyed if they were considered "likely  
needed"
